

# Red Cedar Mulch

Red Cedar Mulch is produced 100% from recycled wood residue. Made from 50% California Redwood and 50% Japanese Cedar, it is suitable for decorative landscape gardening through to large scale plantings.

Its fibrous bark binds together, promoting excellent moisture retention, inhibiting weed growth and securing soil on steep inclines. Over time, this mulch retains its appealing colour and fragrant scent.

The perfect groundcover and protection for new and young plants

Great protection from weather. Mulch protects roots from chilly weather and hot sun

Moisture retention. Holds and releases moisture to ensure constant water supply

Inhibits weed growth. Mulch suppresses new weeds yet supports existing plants

Durable, long-lasting and cost-effective, ensuring excellent results for years to come

INHIBITS WEED  
GROWTH

RETAINS  
MOISTURE

KEEPS SOIL  
COOL

## Product Specifications

- Natural, un-treated timber
- 100% recycled
- 100% weed free
- Specific texture holds on steep gradients, doesn't scatter
- Bulk density (kg per m<sup>3</sup>) – 180 to 250
- Average particle size – 100mm

## Installation Guidelines

- Spread to a minimum depth of 100mm after settling.
- Allow mulch to settle for 48 hours before watering.
- Always follow safe practices, using correct PPE including gloves during application.
- Combination of fibrous bark and woodchip does not allow for blower truck spreading.
